in association with

World Pumps India is very technically informative magazine on pumps & allied products which goes in to various pumping applications. It keeps us updated about the latest technologies in the pump development field. We are not only subscriber of the magazine but we also send a copy to all our distribution network in India.

M L Rathi, Chairman and Managing Director, Rathi Transpower Pvt Ltd

We are glad to associate with World Pumps India. We feel Business News, Interview, Cover Story and Case Study are really useful. The response and support of the staff is excellent.

Ravi Prasad, Director Sales, PSG India

World Pumps India is a first magazine I came across, which is dedicated to pumps and its applications related to the local Industry, i.e. Indian Industry. I found the articles featured and technology update relevant to most of the demanding applications end-users work in. World Pumps India is not a magazine very commercialised, it is more content and facts based, which makes it different from others.

Vinita Singh, Assistant Manager-Marketing and Communications, Cole-Parmer India

Pumps are widely used by the industry and play a central role in the sectors of water supply and sanitation, agriculture, oil and gas production, petrochemicals, mining, power generation, domestic and

household utilities, textiles, etc. World Pumps India is a dedicated magazine for bringing the cost effective and environmentally responsible energy-efficient pumping technologies to India. It has been of tremendous assistance and helped us to incorporate energy efficient motor drives in pumping stations and water supply projects. It has become a leading source of pumps' news and provides good analysis and insight on new technologies, designs, methods, safety, energy efficiency and environment features and data that industry professionals need to decide on the right fit for their requirements. It has contributed to the nation's economy significantly.

Rishabh Sethi, Executive Director, SPML Infra Limited

World Pumps India is just getting better & better on every issue. Being a Next-Gen and hailing from Coimbatore, dubbed as the

pump city of Asia with world class pump manufacturers. I have great hopes on the future of Indian Pump Industry. I see World Pumps India magazine's role as a powerful catalyst in these amazing times to come. My hearty wishes to the young & dynamic team at World Pumps India on completing 5 years. Their best is yet to come. We can & We will !

Kanishka Arumugam, Deccan Pumps Private Limited

World Pumps is a legacy that's hard to miss in Pump World. Dating back to it's International

edition, which were more or less the only formalised pumps magazine once upon a time, it's local India edition, has managed to maintain the same class, quality in it's contents and circulation. Something, we all look forward to read to know the latest, the state-of-the-art and innovation happening in our world of pumps.

Shashi Shankar Naik, Director - Flow Technologies, Pentair Water India Pvt Ltd

World Pumps gives us information of happenings about Indian Pump industry. The new product Launch, Acquisitions, New business avenues are explored very nicely in the magazine. Being compact it's easy to go through and is seen on the desks of almost all agencies dealing with pumps. Congratulations to World Pumps Team for 5th anniversary and all the very best for the future journey.

Nilesh Deshmukh, Manager-Marketing, Crompton Greaves Limited

CONGRATULATIONS and keep up the good work that you have done so far and wish you all the best for the future. However, I would like to see more local issues like star marking on pumps done by BEE

New Delhi. You can do this by asking the manufacturers of the experience and the difficulties faced by them in implementing the same, there would be many issues which may come up.

Rajiv Amin, President, Indian Pump Manufacturer's Association, Managing Director, Garwin Engineering Pvt Ltd
