

SPML Infra wins Rs 488-crore water projects

May 29, 2013

SPML Infra has won Rs396-crore order from PHED, Jaipur for construction, execution and commissioning of 160 MLD water treatment plant. The order also includes designing and constructing of raw and clear water pumping stations, and 1,500 mm dia MS pipeline of 94 km of transmission main from Dhannasar to Sardarsahar. The project will meet the cumulative demand of Ratangarh-Sujangarh & Fatehpur-Laxmangarh towns including all relevant civil, electrical, mechanical, automization and SCADA works. The construction period of the project will be three years and SPML will be responsible for operations and maintenance for 10 years post the commissioning.

Rishabh Sethi, executive director, SPML Infra

This is an extension of existing earlier order of water infrastructure development work in Ratangarh-Sujangarh & Fatehpur-Laxmangarh in Churu district of Rajasthan.

It has won the second order of Rs92 crore from PHED, Jaipur for development of water supply system for 92 villages along with other habitations of tehsil Laxmangarh of Sikar district in Rajasthan. The scope of works includes laying, sectional testing and commissioning of 607 km of pipeline along with other associated works. The project will be completed in two years. SPML will also be responsible for operations and maintenance for 10 years post the commissioning.

“We are excited to receive this new order that will help us build robust infrastructure for providing drinking water to almost half a million population in Churu district and over a lakh population in Sikar district,” said Rishabh Sethi, executive director, SPML Infra, adding that the company has special connect with Rajasthan where it has developed a number of water infrastructure.
