

SPML Infra bags Rs 488 cr Rajasthan water supply, distribution orders

India Water Review: May 22, 2013, 6:56 pm

New Delhi: Leading water infrastructure company SPML Infra has said it has won two major orders worth Rs 488 crore related to water supply and distribution in Rajasthan.

The company said the first order, worth Rs 396 crore, has been received from Public Health Engineering Department (PHED), Jaipur for water distribution network in Churu.

According to a company statement, this is an extension of an existing earlier order of water infrastructure development work in Ratangarh-Sujangarh & Fatehpur-Laxmangarh belt in Churu district of the state.

The scope of work for the new order envisages design, construction, execution, testing and commissioning of 160 million litre per day (MLD) water treatment plant, raw water and clear water pumping stations, 1500 mm dia MS pipeline of 94 kms of transmission main from Dhannasar to Sardarsahar to meet the cumulative demand of Ratangarh-Sujangarh & Fatehpur-Laxmangarh towns including all relevant civil, electrical, mechanical, instrumentation, automization and SCADA works.

The construction period is three years and SPML will be responsible for operations & maintenance (O&M) for 10 years post the commissioning.

The company said the second order of Rs 92 crore has also been received from PHED, Jaipur and is for development of water supply system for 92 villages along with other habitations of Laxmangarh tehsil of Sikar district.

The scope of works include providing, laying, jointing, sectional testing and commissioning of 607 kilometer of pipeline along with other associated works. The construction period for this project is two years and SPML will also be responsible for operations & maintenance for 10 years post the commissioning.
