

The meeco Group Completes 20 kWp Solar Project

News published on 22 / 04 / 2015 by Moulin Oza

The meeco Group, jointly with its Indian subsidiary, meeco India (Pvt) Ltd. has successfully completed a 20 kWp sun2live project in the millennium city of Gurgaon, India. The rooftop installation, that was commissioned last mid-January, consisted in the implementation of photovoltaic modules **on the office rooftop of the engineering company, SPML Infra Limited, in the sector 32 of Gurgaon.** This grid-connected project will enable the building to generate the electric power needed for its operation during the daytime. The sun2live installation has been equipped with high performance Poly-crystalline GreenBrilliance modules. These modules, manufactured at the world class ISO certified manufacturing facility of GreenBrilliance Energy private Limited in Vadodara, meet stringent quality requirements complying with worldwide accepted standards.

GreenBrilliance, is a vertically integrated, end-to-end solar energy Services Company with its state-of-the-art ISO certified manufacturing facility in Gujarat, India. The company manufactures world class, top quality crystalline solar photovoltaic modules ranging from 70 Wp to 300 Wp and certified for Global markets. GreenBrilliance, with offices and presence in several countries is a leading provider of turnkey EPC solutions for residential, commercial, and utility scale (MW size) power plants worldwide.

Present in India through its subsidiary, meeco India (Pvt) Ltd., The meeco Group has completed more than 60 MWp of Photovoltaic projects in India since its foundation in 2010. The meeco Group is one of the world leading companies on the solar energy market. The group delivers solar turnkey solutions and undertakes projects worldwide through its strategic partners and local subsidiaries to address local requirements and community needs.

Mr. Rishabh Sethi, Executive Director, SPML Infra Ltd. said: “SPML Infra Ltd. being a water and environment management company, we are happy that our green energy initiative has begun with installation of rooftop solar power plant at our headquarter building in Gurgaon. The panels will keep the building roof cool and bring down AC usage as well. It is the first office tower in Gurgaon to have a solar rooftop system generating 21kW, thus significantly saving on the electricity consumption.”

sun2live is one of The meeco Group's energy and storage turnkey solutions, ensuring solar power distribution at a small to medium scale, storage of energy and execution of solutions for both grid-connected and off-grid installations. Acting as a 24/7 power supply source or a backup solution, sun2live can provide electricity to households, businesses and communities to cope with the unreliability of the grid, the increasing costs or difficulties to maintain constant power sources. Our modular solutions utilize the latest solar power generation (ground or roof-mounted) and a variety of energy storage solution technologies to meet your specific needs.

Mr. Tarun Munjal, Managing Director of meeco India (Pvt) Ltd. declared: "The project was completed within two weeks of time only, thanks to the know-how and the experience of The meeco Group's expert installers. We expect the plant performance to be at its best thanks to our efficient engineering designs." He added: "meeco India (Pvt) Ltd is glad to have successfully completed this sun2live project with Green Brilliance Modules for SPML Infra Ltd."

Established in 1981, SPML Infra Ltd. is a leading public listed infrastructure development company that has managed and implemented projects across India on EPC (Engineering, Procurement and Construction), PPP (Public Private Partnership) and BOOT (Build-Own-Operate-Transfer) basis. SPML Infra Ltd. is a leading player on the market of water in India and is the only Indian company present across the entire value chain of water cycle. SPML has been featured as the only Indian company in the World's Top 50 of Private Water Management Companies, as per Global Water Intelligence, London.

Currently, SPML Infra Ltd. is developing infrastructure projects worth USD 1,000 Mn and provides drinking water to more than 40 Mn Indian people through the development of various projects. SPML Infra Ltd. has executed more than 600 infrastructure projects, laid more than 5,000 km of water pipeline in the past three decades, for example. The company created significant additional value for India, which has touched millions of people by providing drinking water facilities, improving sewerage network and municipal waste management, building roads and highways, as well as lighting up homes. SPML has developed in-house software for water management system, known as "SPML Aqua", capable of handling O&M, GIS, Revenue Management, CRM and Asset Management.
