SPML wins consolidated orders worth Rs. 262 Crore for water treatment plant & municipal solid waste management

- ⇒ **Rs. 137 Crore order from Goa Water Supply and Sewerage Board for 100 MLD water treatment plant**
- ⇒ **Rs. 125 Crore order from Dehradun Municipal Corporation for municipal solid waste management**

Delhi, May 9, 2011: SPML Infra Ltd., one of India's leading infrastructure development companies with focus in water management, environment and power, has won prestigious orders worth Rs. 262 Crore for water treatment plant and solid waste management.

The first order worth Rs. 137 Crore from Goa Water Supply and Sewerage Board under the aegis of Public Works Department, Govt. of Goa is slated for the expansion of 100 MLD Water Treatment Plant at Salaulim, Goa. The scope of work that includes operation & maintenance for 5 years after commissioning covers aspects like design, supply, installation, construction, testing, trial run, commissioning of the water treatment plant, water filter and clarifier, clear water reservoirs, pumps at intake and clear water pumping stations by installing PLC & SCADA system. The project is funded by Japan International Cooperation Agency (JICA) to Goa Water Supply and Sewerage Board.

The Goa water treatment project will be executed through a joint venture between SPML Infra Ltd and SMC Infrastructures Pvt Ltd. The project entails expansion and rehabilitation of water supply facilities in order to augment the existing water supply system that extracts water from the Salaulim Dam for supply to Mormugao, Salcete, Quepem and part of Sanguem in Southern Goa. Water demand in Goa has been steadily increasing as a result of population growth, improved living standards, industrial development and ever increasing number of tourists (2.6 million in 2010) visiting Goa. The water demand now exceeds the supply capacity and expansion of the infrastructure is the impending need of the hour to meet future demands. The Government of Goa has now proposed to augment the water supply by 200 MLD in two stages; the 1st stage of work has been awarded to SPML – SMC- JV. On the completion of this stage in 30 months, the total capacity of water supply will be enhanced to 260 MLD (160 MLD existing and 100 MLD new addition) of treated water to 1.5 million residents of Goa. The 2nd stage will commence after implementation of the 1st stage.

In another development, SPML has also been awarded the integrated solid waste management project for Dehradun on public-private partnership (PPP) basis. The project, to be implemented in partnership with Dehradun Municipal Corporation, involves design, construction, operations and management of all aspects of municipal solid waste for a period of 14 years with cumulative projected revenue of Rs. 125 Crore.

The project has the capacity of handling 300 tonnes of municipal solid waste per day at present that will grow to 600 tonnes by the end of the concession period of 14 years.

The scope of the project includes door-to-door collection, collection from streets, storage at primary/secondary points of generation and transportation of the waste to landfill sites after adequate segregation and recycling. The project also includes construction and management of a solid waste processing facility and engineered sanitary landfill.

Mr. Rishabh Sethi, Chief Operating Officer, SPML Infra, commented, “The orders from our institutional clients’ are a testimony of our capabilities in executing large water and waste management projects. Providing reliable and quality water for the consumption of the growing population and also for the sustenance of the green revolution in our urban areas would be the foremost challenge for the state and central administration. Therefore, water and environment management are the segments poised to scale-up exponentially in the country. As we have the pre-requisite proven domain expertise of over three decades, we have been chosen as the preferred partner for these upcoming projects”.

About SPML Infra Ltd.:

Established in 1978, SPML Infra Ltd. is a leading infrastructure developer with operational experience of managing and implementing over 400 projects across twenty seven states in India. The Company has three decades of multi-disciplinary experience in installing world class infrastructure for water treatment and transmission, power projects and civil infrastructure construction.

SPML was incorporated as a public limited company in August 1983. An ISO – 9001: 2008 certified company, SPML has executed projects across India and has established proven leadership in the high technology construction of India’s vital urban infrastructure on an EPC (Engineering, Procurement and Construction), PPP (Public Private Partnership) and BOOT (Build-Own-Operate-Transfer) basis.
