SPML Infra Promotes Water Conservation thru Graffiti Art

New Delhi, Sep 30, 2013

Water is an essential substance upon which all life depends. Where there is water there is life, and where water is scarce, life has to struggle. Keeping this concept in mind and making people of Delhi aware about the importance of water, SPML Infra has created a unique piece of graffiti art on the wall of its MVV Water Supply project office at Vasant Vihar. This art is aesthetically painted on a 6 ft wide and 110 ft long wall depicting the eternal nature of water. *The personality of water has been depicted through women, it can be calm, serene and fluid almost like a mother and at other times, it can be extremely powerful, vengeful and crush you with extreme force. Between these two extremes is where all the life that exist, depicted by various elements floating in the waves.* It is an effort towards beautifying the city and incorporating art in people's everyday lives.

This art piece is well placed at Vasant Vihar-West End Red Signal on Outer Ring Road and thus visible to thousands of commuters and local residents every day. We have planned to create similar artworks at different places to promote the cause of water among Delhi residents, making them aware about the importance of water, its conservation and proper management.

Mr. Rishabh Sethi, Executive Director, SPML Infra, commented, *"SPML has been promoting sustainable water management – a task that is increasingly becoming important and complex as natural supplies deplete and demand rises. We are executing a number of water and wastewater projects in Delhi such as water supply improvement schemes, sewage and effluent treatment plants, pumping stations, drinking water pipelines and sewer pipe rehabilitation etc. In the water sector, SPML is committed to provide sustainable solutions for better life."*

About SPML Infra Ltd.:

SPML Infra Ltd. is a leading infrastructure development company with over three decades of experience in implementing over 400 projects in water supply and management, wastewater treatment and reuse, sewer-line rehabilitation and power (RE) development, transmission and distribution in India.
