

Progress is essential and it assumes prominence in one's individual life as well as in an organization. The taste of success knows no bounds. We have achieved remarkable progress in installation of ATP services in the state of Karnataka. Our company is on the path of progress and has emerged as one of the most efficient and progressive ATP service providers for utility payment in the country - which is a testimony to the hard work and dedication instilled in the system by all of us.

SPML TECH's ATP now at TIPTUR, Tumkur District

We are located at Tiptur, the industrial hub of Tumkur in the state of Karnataka. It is world's largest copra producing center and also famous for excellent educational institutions. To make it convenient to the public, ATP Machine has been installed by BESCO for utility payment collection through SPML on 1st April 2009.

Inauguration of ATP System at Challakere - Karnataka

Challakere is a taluk headquarter in Chitradurga District of Karnataka and is located approximately 30 km east of Chitradurga, the district headquarter. Challakere is also known as the 'Oil City' of Karnataka and is India's second largest producer/supplier of edible oil, after Mumbai. To provide better and enhanced services to the public, BESCO installed SPML Any Time Payment (ATP) systems in Challekere.

Shri Nanjaiya, Chief Engineer of BESCO Davangere Circle, inaugurated the ATP System at BESCO Challekere on 1st April, 2009.

Inauguration of ATP at Harihara Town - Davangere District

Mr. Nanjiah (Chief Engineer of BESCO Chitradurga district) inaugurated an ATP machine on May 28th 2009, at Harihara Town (Davangere District). This ATP service will help around 50,000 consumers at Harihara town. This new addition has brought the total number of machines installed at Davangere district to 3.

Trial run of information kiosk at Sri Chamarajendra Zoological Gardens (Mysore Zoo)

SPML Tech had installed an information kiosk at Sri Chamarajendra Zoological Gardens popularly known as the Mysore Zoo. This was a three-day trial run of the system wherein the visitors could access to the information regarding the zoological garden (History, special attractions, etc.) through this kiosk.

ISO Certificate

SPML Tech was certified for ISO 9001:2000 during December 2006. The certificate was obtained for "Installation and Maintenance of Any Time Payment Systems"

SPML Tech got "Software Design Services" included during Aug 2008. The scope included was "Design, Development, Implementation and Maintenance of Software Applications related to Utility Services".

SPML Tech is now proud to announce that the ISO Certification is upgraded to the latest standards of ISO 9001:2008. We have also added Design & Development, Installation and Maintenance of Any Time Payment Systems.

SPML Tech DMS: Capture (The Ability to Import Different Types of Documents)

There are three primary methods of bringing files into a document management system:

- Scanning or imaging, for paper files
- Importing, for archiving electronic documents such as word processing files, spreadsheets, faxes, audio and video
- Conversion, for creating unalterable images of electronic documents

Scanning : Scanning a document produces a raster (picture) image that can be stored on a computer. When you choose a scanner, it is important to consider the size and volume of paper to be scanned, along with price and over all budget. The ability to support a wide range of scanners is one of the defining characteristics of a versatile document management system.

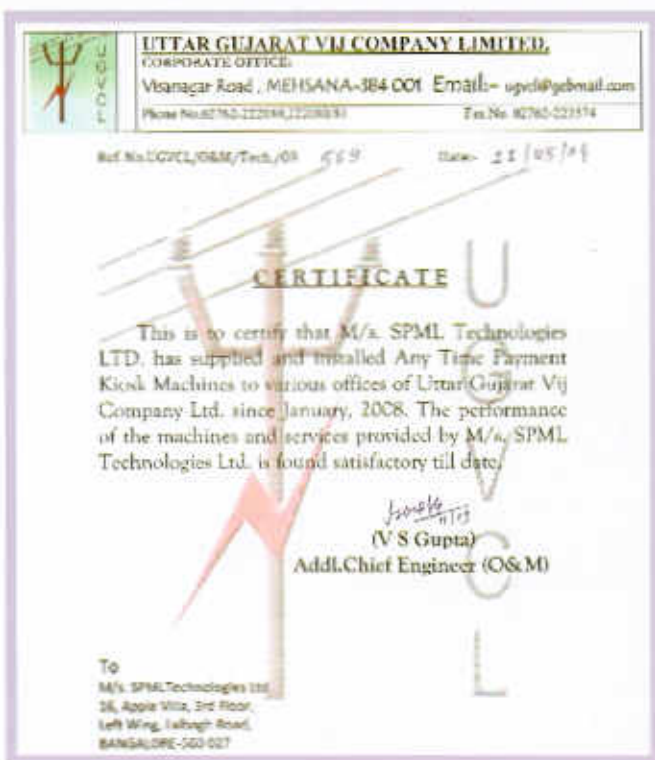

Importing: Document importing is the process of bringing electronic files, such as Microsoft Office suite documents, graphics, audio clips or video files, into a document management system. Files can be dragged into a document management system and remain in their native formats. These files can be viewed in their original format by either launching the originating application or by using an embedded file viewer from within the document management system.

Conversion: Converting documents is the process of transforming electronic files, such as word processor or spreadsheet documents, into permanent, raster-image format for storage within a document management system. Windows applications, such as Microsoft Word, Excel or Auto desk AutoCAD can print existing files into an unalterable image of the document.

Customer Testimonial:

For any organization a testimonial from the customers is the biggest credential. SPML Technologies Ltd. has been getting a good response and feedback from our clients. Attached herewith is a certified testimonial for the same from UGVCL - UTTAR GUJARAT VIJ COMPANY LIMITED.
