

SPML Infra surges on installing Solar Power Plant at its Headquarter Building in Gurgaon

Apr 29, 2015 12:38

SPML Infra has installed Solar Power Generation plant at its Headquarter Building at Gurgaon. It is the first office tower in Gurgaon to have a solar rooftop system generating 21 KW thus significantly saving on the electricity consumption.

The instantaneous generation capacity of 21 KW will help SPML to save more than 27,000 units of electricity per year and the Carbon Footprint will be reduced by 43,800 lbs/year. The panels will also keep the building roof cool and bring down AC usage as well. It is the first office tower in Gurgaon to have a solar rooftop system generating 21 KW thus significantly saving on the electricity consumption.

SPML has taken this initiative to install Rooftop Solar Power Generation plant even before the notification issued by Govt. of Haryana making it mandatory to install the same on all residential and commercial buildings having a plot size of 500 Sq. Yard.

SPML Infra is a single source solution provider for various multi disciplinary engineering and infrastructure services from conceptualization to maintenance in water, power, environment and infrastructure projects.
