

Global Spotlight

Aquatech is pleased to announce that 80 percent of the conference program for the Innovation Forum is now complete.

Canary Island project announced

IDE Technologies announced that is continuing a 50-year tradition of providing desalination plants to the Canary Islands by supplying a chemical-free SWRO solution to Aguas De Arguineguín, a water utility company. The plant has a capacity of 1,000 m³/day and utilizes IDE PROGREEN™, which delivers affordable, clean water without the use of chemicals and with reduced energy consumption. The plant will be able to better meet increasing water demands due to tourism, without using harmful chemicals. Arguineguín is a picturesque tourist location on Gran Canaria's south coast, the largest island in the archipelago. The existing desalination plant was built 36 years ago. IDE was awarded the project in late 2017, which included production and distribution.

Asia Grundfos expansion announced

In August, P.T. Grundfos Pompa

inaugurated its new office building in Surabaya, Indonesia. The new branch office is proof of Grundfos' steady growth in Indonesia and will help cater to customers across key segments including industry, water utility, and commercial and domestic building services. Kim Jensen, Regional Managing Director-Grundfos Asia Pacific Region, Giancarlo Roggiolani, General Manager-Grundfos Indonesia & Philippines along with the key management team members from Indonesia, customers and partners were present at the inaugural event.

India sustainable water model to be developed

SPML Infra Limited, India's leading water management company will play a key role in the development of sustainable water infrastructure to realize the vision of Nal Se Jal. This ambitious scheme announced by the Finance Minister aims to provide piped water connection to every household in India by 2024. Given the massive number of connecting about 140 million remaining rural and urban households in five years' time will be a challenging task.

Cartwright Consulting Co.

*Consultants to the
Water & Wastewater Industry*

Consulting Engineering in:

- Water Purification
- Wastewater Treatment
- Drinking Water
- Medical / Pharmaceutical
- Chemical / Food Processing
- Ultrapure Water Design
- Microbiological Control / Reduction
- Separation Processes
- Membrane Technologies
- Ozonation / Ultraviolet Irradiation

Providing:

- Technical Consulting
- Engineering Design
- Application / Performance Testing
- Educational Services / Training
- Market Analysis / Studies
- Operator Training
- Research & Development
